

A high-angle photograph of an offshore oil and gas platform deck. The deck is a complex network of yellow-painted metal walkways, railings, and pipes. Two workers in bright orange safety suits and white hard hats are standing on the deck, looking towards the background. The background shows the vast blue ocean under a clear sky. The overall scene conveys a sense of industrial scale and maritime operations.

**55 years of domestic gas security
through stability, investment and
reliability**
